

**FOR IMMEDIATE RELEASE**

## **Candor Midstream's SCOOP-to-North-Texas Rich Gas Gathering Pipeline System Now Open for Commercial Service**

- **100 miles of 20-inch gathering pipeline is in service to gather rich gas from Oklahoma's SCOOP play to premium markets in North Texas.**
- **The system creates an immediate solution to bottlenecks in southern Oklahoma, providing producers with access to higher netbacks from advantaged processing and NGL markets in North Texas.**

HOUSTON – September 24, 2019 – [Candor Midstream, LLC](#) ("Candor") announced today that its SCOOP-to-North-Texas ("SCOOP-NORTHTX") Rich Gas Gathering Pipeline System is open for commercial service. Recognizing pipeline constraints within the SCOOP, Candor purchased the system in January 2019. To best serve producers, Candor made multiple upgrades to the pipeline system and has successfully completed comprehensive hydrostatic testing to certify its safe return to commercial service.

The system consists of approximately 100 miles of 20-inch rich gas gathering pipeline that originates in northern Carter County, Oklahoma and extends south across the Oklahoma-Texas border before it terminates near processing facilities located at the market center in Bridgeport, Texas. Map [here](#).

The SCOOP-NORTHTX pipeline has an initial operational capacity of up to 200 million cubic feet per day. Its strategic location in the heart of Oklahoma's SCOOP play provides regional producers with an immediate outlet to premium processing markets in north Texas, which helps bolster producer economics.

"The SCOOP-NORTHTX pipeline debottlenecks the region and offers rich gas gathering solutions and expansion opportunities that are specifically tailored to meet producers' individual needs in this unique area of Oklahoma and Texas," said Candor President & CEO Darrel L. Hagerman.

Candor Chief Commercial Officer Derek Gonseaux added, "The SCOOP-NORTHTX pipeline gives Candor the ability to provide unparalleled flow assurance with competitive and reliable processing and, most importantly, access to premium gas and NGL markets, which provide our customers with superior producer netbacks."

To enhance the pipeline and better serve producers, Candor constructed multiple risers for commercial rich gas receipts, upgraded equipment and added pipeline monitoring capabilities that exceed industry standards. “Our goal is to provide producers working in southern Oklahoma with safe and reliable long-term service that gathers their rich gas to premium markets in North Texas,” Hagerman said.

### **About Candor Midstream, LLC**

Candor Midstream is an independent energy company that provides a full suite of midstream services to oil and gas producers across the U.S. Candor is led by a team of seasoned industry professionals who have worked in virtually every shale play in the country and are well-known and trusted by the industry’s premier operators. Headquartered in Houston, Candor was established in 2017 by President and CEO Darrel Hagerman. The company is backed by [EnCap Flatrock Midstream](#).
